### **ISSUE:**

Purchase new lockers to replace lockers in Family Fitness Center Locker Rooms

### **SYNOPSIS:**

The lockers at the Fitness Center are old, rusting, bent and in a general condition of decay. Bids for new lockers were solicited through a public bid process. The lowest responsible bidder is Rex Williams and Sons for \$33,675.00. Funds for the new lockers will come from the Fitness Center's Repair and Replacement Reserve. This bid will allow replacement of all the lockers except the pay lockers near the gymnasium.

### **BACKGROUND:**

The lockers in the Family Fitness Center are over ten years old. The metal lockers are well used, suffered some abuse, bent, dented, rusting, and are no longer secure for storing clothing and valuables. Bids were solicited through public advertising to remove the old lockers and provide and install new lockers. These bids are for all the lockers except the pay lockers near the gymnasium. Four bidders responded:

<b>Bids:</b>	<b>LOCKERS</b>	<b>LABOR</b>	<b>TOTAL</b>
1) Rex Williams and Sons	\$31,415.00	\$2,260	\$33,675.00
2) Robert Merrill	\$34,858.99	\$4,204	\$39,062.99
3) Jorgenson Material Handling	\$34,975.00	\$2,695	\$37,670.00
4) Locker Solutions	\$41,415.00	NA	NA

The new lockers are solid-color plastic, with number plates and coat hooks. They come with vandal-resistant latches, lock more securely, are rust-resistant and impervious to moisture. They will not warp nor dent. The funds for the lockers are from the Fitness Center Repair and Replacement Fund.

### **RECOMMENDATION:**

Award the bid to provide and install new lockers to Rex Williams and Sons for \$33,675.00.
